Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

Species I - Figures 1-7.

Species II – Figure 8.

The species are independent or distinct because 8 has a three phase inverter and Figs. 1-7 do not have.

2. Applicants are required under 35 U.S.C. to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

3. Applicants are advised that the reply to this requirement must include an identification of the species that is elected consonant with this requirement, and listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP§ 809.02(a)

4. Because these inventions are independent or distinct for the reason given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP§ 808.02), restriction for examination purposes as indicated is proper.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jasmine Clark whose telephone number is (571) 272-1726. The examiner can normally be reached on M-F.
